CRC cards:

Class: WebServer	Collaborators:
Serves pages to clients	HttpExchange
Gets content from filesystem, modifies with SimpleTemplater	SimpleTemplater
Delegates POST requests to handler classes	CreateAccount, CreateEvent

Class: SimpleTemplator	Collaborators:
Processes pages passed to it, injects dynamic content based on the database	AccountModel, EventModel

Class: AccountModel	Collaborators:
Stores/retrieves account data from the database	java.sql.Connection

Class: EventModel	Collaborators:
Stores/retrieves events data from the database	java.sql.Connection

Class: PostRequestProcessor	Collaborators:
Parses HTTP POST headers into a Map, and calls an abstract method on that Map (Template Method Design Pattern)	CreateAccount, CreateEvent

Class: CreateAccount	Collaborators:
Responds to HTTP POST requests to create accounts	AccountModel

Class: CreateEvent	Collaborators:
Responds to HTTP POST requests to enter events into the database	EventModel

Class: Scraper	Collaborators:
Crawls websites for events, puts them into database	EventModel
